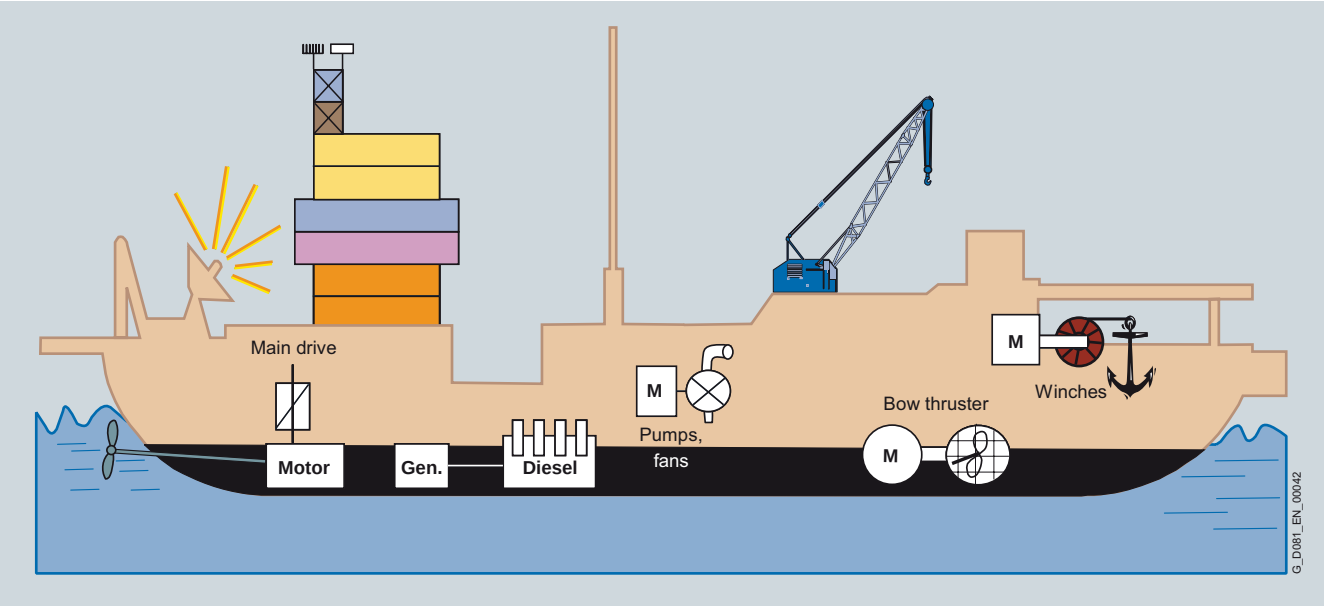
Our type approved marine motors are specially designed for use on board ship below deck and for the offshore industry:

- Applications on board ship as main and auxiliary drives below deck, e.g.:
  - Fans (air conditioning, refrigeration plants)
  - Pumps (for fire-extinguishing water, fuels, oils)
  - Winches (anchor winches, warping winches, lifting gear)
  - Compressors
  - Bow thruster drives
  - Ex motors for areas subject to explosion hazards
- Application in the offshore industry
  - Coastal areas, e.g. production platforms, production ships



Typical areas of application
