1) The armature/field supply voltage can be less than the rated supply voltage armature/field (set with Parameter P078; for converters with 400 V rated voltage, input voltages of up to 85 V are permissible). The output voltage is reduced accordingly. The specified output DC voltage can be guaranteed up to undervoltages 5 % below the supply voltage (rated supply voltage armature/field).

2) Values apply to output rated DC current.

3) Load factor K1 (DC current) as a function of the coolant temperature (see P077 Operating Instructions, Section 11).

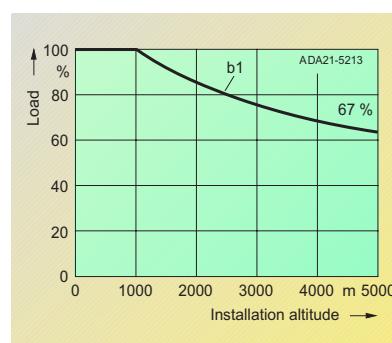

K1 > 1 only permissible where  $K1 * K2 \leq 1$ .  
overall reduction factor  $K = K1 * K2$   
(for K2 see Footnote 4).

Ambient or coolant temperature	Load factor K1 In devices with self-cooling	In devices with enhanced cooling
$\leq +30$ °C	1.18	1.10
+35 °C	1.12	1.05
+40 °C	1.06	1.00
+45 °C	1.00	0.95
+50 °C	0.94	0.90 <sup>a)</sup>
+55 °C	0.88	
+60 °C	0.82 <sup>b)</sup>	

a) In spite of derating, converters of  $\geq 400$  A with enhanced cooling may be operated at an ambient or coolant temperature of 50 °C only if the rated supply voltage of the converter fan is safely within the limited tolerance range of 400 V  $+10\%$  -15%.

b) Not permissible when T400 or OP1S are used.

4) Load values K2 as a function of the installation altitude (see P077 Operating Instructions, Section 11). Overall reduction factor  $K = K1 * K2$  (for K1 see Footnote 3).

Curve b1: Reduction factor of load values (DC current) at installation altitudes above 1000 m.

Installation altitude m	1000	2000	3000	4000	5000
Reduction factor K2	1.0	0.835	0.74	0.71	0.67

The supply voltages for all electric circuits are possible for site altitudes up to 5000 m with basic insulation, with the exception of converters for rated supply voltages:

Installation altitude	Rated supply voltage 830 V	950 V
up to 4000 m	max. 830 V	950 V
up to 4500 m	max. 795 V	933 V
up to 5000 m	max. 727 V	881 V

5) See Section 5.

8) For UL systems, a Siemens motor protection circuit-breaker Type 3RV1011-0KA1 or 3RV1011-1AA1, adjusted to 1.25 A for the fan motor Type RH28M-2DK.3F.1R must be installed in 6RA7090, 6RA7091, 6RA7093 and 6RA7095 converters with a rated voltage of 400 V or 575 V.

9) Operation in the extended frequency range of 23 Hz to 110 Hz is possible on request.
